MANDIRM (Mandiram)

Unified REST API Specification & End-to-End Feature Architecture Guide

CONFIDENTIAL
Platform API Reference
v1.0.0 • Oct 2026

Platform Scope: Mandirm is India's leading comprehensive Sanatan Dharma digital platform. It synchronizes four client applications: **Consumer Mobile App (Flutter)**, **Certified Astrologer App (Flutter)**, **Consumer Website (Next.js)**, and **Admin Portal (Next.js)**. The unified backend is powered by **FastAPI (Python)**, **Supabase PostgreSQL**, **Agora RTC**, **Razorpay Payment Gateway**, and **Resend Email Verification**. This document details all **94 production API endpoints** across 16 core business domains, their security controls, and exact feature mapping.

Total Active Endpoints	Business Domains	Client Applications	Sacred Mandirs & Pujas
94	**16**	**4 (App, Web, Astro, Admin)**	**108+ & 250+**

1. System Architecture & Client Matrix

Client Application	Technology Stack	Key Features & Responsibilities
Consumer Mobile App	Flutter (Dart), BLoC, GoRouter, Supabase Auth, Agora RTC	Online Puja booking with Sankalp, Live Darshan streams, Chadhawa offerings, 1-on-1 audio/video astrologer calls, 24/7 AI Jyotish chatbot modal, Prasad tracking.
Consumer Website	Next.js 14 (React, TypeScript), TailwindCSS, Zustand	Full responsive web portal, Floating & Docked Bottom Navigation Bar, Global 24/7 AI Jyotish chatbot, Puja catalog, Astrologer bookings, E-commerce Divine Store.
Astrologer Mobile App	Flutter (Dart), Provider/BLoC, Agora RTC	Astrologer console: Online/Offline availability toggles, Incoming audio/video consultation call handling, Real-time chat with WhatsApp-style ticks, Earnings wallet, Payout requests.
Admin Control Panel	Next.js, TailwindCSS, Supabase Realtime	Executive analytics dashboard, Puja booking approvals, Hereditary priest assignment, Chadhawa creation, User role assignment, Transaction financial ledger.
Unified Backend API	FastAPI (Python 3.12), Supabase PostgreSQL, Pydantic	RESTful API with 94 endpoints, JWT authentication, Resend Email OTP engine, Agora RTC token generator, Parashara Vedic astrology engine, Razorpay webhook settlement.

2. Complete API Reference by Business Domain

Every endpoint across the Mandirm platform is documented below with its HTTP method, URL pattern, feature utility, client consumers, and input/output payload schemas.

2.1 Authentication & Devotee Profile Management

Handles passwordless authentication for Devotees, Certified Astrologers, and Platform Admins via Resend Email OTP and Mobile SMS, JWT Bearer tokens, and Devotee Gotra/Rashi profiles.

Method & Endpoint	Feature Purpose & Exact Usage	Target Clients	Key Parameters & Output
[POST] **/api/v1/auth/otp/send**	Sends a secure 6-digit verification code to the user's mobile number or email address via Resend API.	**Consumer App, Astrologer App, Website**	Req: phone: string (or email: string), role: 'user' | 'astrologer' | 'admin' Res: {status: 'success', message: 'OTP sent successfully', request_id: string}

[POST] /api/v1/auth/otp/verify	Verifies OTP and returns user profile, role, and signed JWT authentication bearer token.	Consumer App, Astrologer App, Website	Req: phone/email: string, otp: string, role: string Res: {access_token: string, token_type: 'bearer', user: UserProfile}
[POST] /api/v1/auth/email-otp/send	Specialized high-deliverability Resend endpoint for instant email OTP verification with temple branding.	Consumer Website, Consumer App	Req: email: string Res: {status: 'sent', email: string, expires_in_seconds: 300}
[POST] /api/v1/auth/email-otp/verify	Direct verification for email login, returning session token without requiring SMS gateway.	Consumer Website, Consumer App	Req: email: string, otp: string Res: {access_token: string, user: UserProfile, is_new_user: boolean}
[GET] /api/v1/auth/me	Retrieves the complete profile of the currently logged-in Devotee or Astrologer, including Gotra, Rashi, and Wallet.	All Clients	Req: Header: Authorization: Bearer Res: UserProfile: {id, phone, email, full_name, gotra, rashi, nakshatra, role, wallet_balance, avatar_url}
[PUT] /api/v1/auth/profile	Updates Devotee's sacred personal details: Name, Gotra (e.g. Kashyap, Bharadwaj), Rashi (Aries, etc.), and Avatar.	Consumer App, Website	Req: Body: {full_name?, gotra?, rashi?, nakshatra?, avatar_url?, phone?} Res: {status: 'updated', user: UserProfile}

2.2 Temples & Sacred Darshan (108+ Mandirs)

Powers the discovery of 108+ revered pilgrimage shrines across India (Kashi Vishwanath, Mahakaleshwar, Tirupati Balaji, Kamakhya, etc.), their historical significance, deities, and daily Live Aarti streams.

Method & Endpoint	Feature Purpose & Exact Usage	Target Clients	Key Parameters & Output
[GET] /api/v1/temples	Lists all 108+ sacred temples with deity filtering, state, city, and active live darshan streaming status.	Consumer App, Consumer Website	Req: Query: deity?, state?, search?, limit=50, offset=0 Res: {total: int, data: List[TempleSummary: {id, name, city, state, deity, hero_image, live_darshan_active}]}
[GET] /api/v1/temples/{temple_id}	Retrieves complete temple profile including historical lineage, available pujas, chadhawa offerings, and daily timings.	Consumer App, Consumer Website	Req: Path: temple_id: string Res: TempleDetail: {id, name, city, state, deity, about, timings, live_stream_url, pujas: [], chadhawas: []}
[POST] /api/v1/temples	Admin endpoint to onboard and register a new temple shrine with images, coordinates, and priest council details.	Admin Panel	Req: Body: {name, deity, city, state, address, about, hero_image, timings} Res: {status: 'created', temple_id: string}
[PUT] /api/v1/temples/{temple_id}	Admin endpoint to update temple details, modify timings, or update high-definition hero banners.	Admin Panel	Req: Path: temple_id, Body: Partial[TempleUpdate] Res: {status: 'updated', temple: TempleDetail}
[DELETE] /api/v1/temples/{temple_id}	Admin endpoint to deactivate or soft-delete a temple profile.	Admin Panel	Req: Path: temple_id: string Res: {status: 'deleted', temple_id: string}
[GET] /api/v1/temples/{temple_id}/live	Returns real-time HLS/WebRTC live video streaming URL for ongoing daily Bhasma Aarti, Shringar, or Darshan.	Consumer App, Website	Req: Path: temple_id: string Res: {temple_name, live_stream_url, is_live: bool, current_aarti_name, viewers_count}
[PUT] /api/v1/temples/{temple_id}/live-status	Admin / Temple Priest toggle to start or stop the live streaming broadcast URL.	Admin Panel	Req: Path: temple_id, Body: {is_live: bool, live_stream_url: string, current_aarti_name: string} Res: {status: 'live_status_updated'}

2.3 Vedic Pujas & Sacred Rituals Catalog

Catalog of authentic Vedic rituals (Maha Rudrabhishek, Navchandi, Kaal Sarp Shanti, Baglamukhi Anushthan) performed by hereditary temple priests on behalf of devotees.

Method & Endpoint	Feature Purpose & Exact Usage	Target Clients	Key Parameters & Output
[GET] /api/v1/puja	Lists all available puja services with category filters (Havan, Griha, Dosha Nivaran, Vivah, Navgraha, Special).	Consumer App, Consumer Website	Req: Query: category?, temple_id?, search?, limit=50 Res: {total: int, data: List[PujaService: {id, title, deity, category, starting_price, temple_id, benefits}]}
[GET] /api/v1/puja/{puja_id}	Returns full puja details including Vedic significance, required samagri, packages (Individual, Family, VIP), and next auspicious dates.	Consumer App, Consumer Website	Req: Path: puja_id: string Res: PujaDetail: {id, title, description, temple_name, packages: [{name, price, includes}], auspicious_dates: []}
[POST] /api/v1/puja	Admin endpoint to publish a new puja ritual, define packages, and specify authentic temple association.	Admin Panel	Req: Body: {title, temple_id, category, deity, description, packages, base_price} Res: {status: 'created', puja_id: string}
[PUT] /api/v1/puja/{puja_id}	Admin endpoint to update puja ritual description, package pricing, or auspicious dates.	Admin Panel	Req: Path: puja_id, Body: Partial[PujaUpdate] Res: {status: 'updated', puja: PujaDetail}
[DELETE] /api/v1/puja/{puja_id}	Admin endpoint to archive or unpublish a puja ritual.	Admin Panel	Req: Path: puja_id: string Res: {status: 'archived', puja_id: string}
[GET] /api/v1/puja/categories	Returns all recognized Vedic puja categories with icons and count of available rituals.	Consumer App, Consumer Website	Req: None Res: List[{key: string, name_en: string, name_hi: string, icon: string, count: int}]
[GET] /api/v1/puja/featured	Returns the spotlight featured and trending festival pujas for the home screen banner carousel.	Consumer App, Consumer Website	Req: None Res: List[PujaServiceSummary]

2.4 Sacred Chadhawa & Sewa Offerings (■■■■■■)

Enables devotees globally to send sacred physical offerings (Pure Cow Ghee, Shringar, 108 Bilva Patra, Peetambar, Dhoop) to temple deities in their Gotra, followed by sanctified proof photos.

Method & Endpoint	Feature Purpose & Exact Usage	Target Clients	Key Parameters & Output
[GET] /api/v1/chadhawa	Lists all holy offerings available across temples with prices, deity association, and spiritual merits.	Consumer App, Consumer Website	Req: Query: temple_id?, deity?, limit=50 Res: {total: int, data: List[ChadhawaOffering: {id, title, price, temple_name, deity, image_url}]}
[GET] /api/v1/chadhawa/{offering_id}	Returns full details of an offering, including sacred mantra recited during submission and prasad delivery eligibility.	Consumer App, Consumer Website	Req: Path: offering_id: string Res: ChadhawaDetail: {id, title, description, price, temple_id, deity, includes_prasad: bool}
[POST] /api/v1/chadhawa/offer	Submits a chadhawa order with the devotee's Name, Gotra, and custom prayers to be chanted before the deity.	Consumer App, Consumer Website	Req: Body: {offering_id, temple_id, devotee_name, devotee_gotra, prayer_wish, amount} Res: {status: 'submitted', order_id: string, payment_link: string}
[GET] /api/v1/chadhawa/user/orders	Returns the complete history of chadhawas offered by the authenticated devotee along with photo proof links.	Consumer App, Consumer Website	Req: Header: Authorization Res: List[ChadhawaOrder: {id, offering_name, temple_name, gotra, offered_date, proof_image_url, status}]

[POST] /api/v1/chadhawa	Admin endpoint to create a new holy chadhawa offering in the catalog.	Admin Panel	Req: Body: {title, description, price, temple_id, image_url} Res: {status: 'created', offering_id: string}
[PUT] /api/v1/chadhawa/{offering_id}	Admin endpoint to update offering price, image, or description.	Admin Panel	Req: Path: offering_id, Body: Partial[ChadhawaUpdate] Res: {status: 'updated'}
[DELETE] /api/v1/chadhawa/{offering_id}	Admin endpoint to disable a chadhawa offering.	Admin Panel	Req: Path: offering_id: string Res: {status: 'deleted'}

2.5 Devotee Puja Bookings & Sankalp Lifecycle

Manages the end-to-end lifecycle of an online puja booking: Devotee Sankalp (Name, Gotra, Family Members, Wishes), Priest assignment, Live private streaming link, and sanctified Prasad tracking.

Method & Endpoint	Feature Purpose & Exact Usage	Target Clients	Key Parameters & Output
[POST] /api/v1/bookings	Creates a verified puja booking with complete Sankalp details and generates an order ledger entry.	Consumer App, Consumer Website	Req: Body: {puja_id, package_type, booking_date, sankalp_name, sankalp_gotra, family_members: [], sankalp_wishes, delivery_address, amount} Res: {status: 'created', booking_id: string, order_id: string, amount: float}
[GET] /api/v1/bookings	Lists all puja bookings for the authenticated devotee with current status (Pending, Confirmed, In-Progress, Completed).	Consumer App, Consumer Website, Admin Panel	Req: Query: status?, limit=50 (Admins can view all users' bookings) Res: {total: int, data: List[PujaBookingDetail]}
[GET] /api/v1/bookings/{booking_id}	Retrieves comprehensive booking tracking: Assigned Temple Priest, Ritual Time, Live Stream Link, Recorded Sankalp Video URL, and Prasad Courier AWB.	Consumer App, Consumer Website	Req: Path: booking_id: string Res: PujaBookingDetail: {id, puja_title, temple_name, booking_date, sankalp_name, sankalp_gotra, status, priest_name, live_stream_url, recorded_video_url, prasad_tracking_id}
[PUT] /api/v1/bookings/{booking_id}/status	Admin / Temple Priest updates ritual status, assigns verified priest, attaches recorded sankalp video link, or adds prasad tracking number.	Admin Panel	Req: Path: booking_id, Body: {status: 'confirmed'|'in_progress'|'completed', priest_name?, live_stream_url?, recorded_video_url?, prasad_tracking_id?} Res: {status: 'updated', booking_id: string}
[POST] /api/v1/bookings/{booking_id}/cancel	Allows devotee to cancel an upcoming booking before priest assignment according to fair refund policy.	Consumer App, Consumer Website	Req: Path: booking_id: string, Body: {reason: string} Res: {status: 'cancelled', refund_status: 'initiated'}
[GET] /api/v1/bookings/active	Quick helper endpoint returning active and upcoming pujas scheduled for today for push notifications.	Consumer App, Website	Req: Header: Authorization Res: List[PujaBookingSummary]

2.6 Certified Astrologer Directory & Profiles

Directory of verified Vedic scholars, Acharyas, and Numerologists holding accredited degrees from BHU/Sampurnanand Sanskrit University, their real-time availability, and calling rates.

Method & Endpoint	Feature Purpose & Exact Usage	Target Clients	Key Parameters & Output

[GET] /api/v1/astrologers	Lists verified astrologers with live online/offline status, call rates (■/min), specialities, languages, and ratings.	Consumer App, Consumer Website	Req: Query: speciality?, language?, is_online?, search?, sort_by='rating' Res: {total: int, data: List[AstrologerSummary: {id, name, title, rating, consultations_count, per_minute_call_rate, per_minute_chat_rate, is_online, avatar_url}]}
[GET] /api/v1/astrologers/{astrologer_id}	Retrieves comprehensive astrologer profile including educational pedigree, bio, client reviews, pricing tiers, and certifications.	Consumer App, Consumer Website	Req: Path: astrologer_id: string Res: AstrologerDetail: {id, name, title, bio, experience_years, languages: [], specialities: [], rating, reviews: [], rates: {call, video, chat}, is_online}
[PUT] /api/v1/astrologers/{astrologer_id}/availability	Astrologer App toggle to set real-time status: Online/Offline, Call Active, and Chat Active.	Astrologer App	Req: Path: astrologer_id, Body: {is_online: bool, is_call_active: bool, is_chat_active: bool} Res: {status: 'updated', is_online: bool}
[PUT] /api/v1/astrologers/{astrologer_id}/profile	Astrologer App endpoint to update biography, consultation rates, languages spoken, and bank details.	Astrologer App	Req: Path: astrologer_id, Body: AstrologerProfileUpdate Res: {status: 'profile_updated'}
[GET] /api/v1/astrologers/{astrologer_id}/earnings	Astrologer App financial overview: Total earnings, monthly consultations, wallet balance, and pending payout ledger.	Astrologer App	Req: Path: astrologer_id, Header: Authorization Res: {wallet_balance: float, total_earned: float, total_consultations: int, pending_payout: float, history: []}
[POST] /api/v1/astrologers/{astrologer_id}/payout	Astrologer App withdrawal request to transfer earned dakshina to Bank Account (IMPS) or UPI ID.	Astrologer App	Req: Path: astrologer_id, Body: {amount: float, payout_method: 'upi'|'bank', upi_id?, bank_details?} Res: {payout_request_id: string, status: 'processing', amount: float}
[GET] /api/v1/astrologers/{astrologer_id}/service-requests	Astrologer App list of special requested services (Detailed Janam Kundli creation, Matchmaking Gun Milan, Vastu audit).	Astrologer App	Req: Path: astrologer_id: string Res: List[ServiceRequest: {id, devotee_name, service_type, birth_details, status, fee}]
[POST] /api/v1/astrologers/{astrologer_id}/reviews	Allows a devotee who completed a consultation to rate and write a verified review for the astrologer.	Consumer App, Consumer Website	Req: Path: astrologer_id, Body: {consultation_id, rating: 1-5, review_text} Res: {status: 'review_posted', new_rating: float}

2.7 Consultations & Real-Time Agora RTC Engine

Powers real-time audio and video consultations between devotees and astrologers using Agora RTC token generation, minute-by-minute billing, and session status tracking.

Method & Endpoint	Feature Purpose & Exact Usage	Target Clients	Key Parameters & Output
[POST] /api/v1/consultations/request	Devotee initiates a consultation session (audio, video, or chat) with an online astrologer; locks initial wallet hold.	Consumer App, Consumer Website	Req: Body: {astrologer_id, consultation_type: 'voice'|'video'|'chat', devotee_details: {name, dob, tob, pob, problem_area}} Res: {consultation_id: string, status: 'requested', astrologer_id: string, estimated_wait_seconds: int}
[GET] /api/v1/consultations/{consultation_id}	Fetches current session status, room ID, connected participant details, and elapsed consultation seconds.	Consumer App, Astrologer App, Website	Req: Path: consultation_id: string Res: ConsultationDetail: {id, status: 'requested'|'active'|'completed'|'cancelled', type, start_time, duration_seconds, total_amount}

[POST] /api/v1/consultations/{consultation_id}/accept	Astrologer App responds to incoming call notification, accepts the session, and triggers Agora RTC room setup.	Astrologer App	Req: Path: consultation_id: string Res: {status: 'active', room_id: string, joined_at: timestamp}
[POST] /api/v1/consultations/{consultation_id}/reject	Astrologer App declines incoming call due to emergency; auto-refunds devotee's hold amount.	Astrologer App	Req: Path: consultation_id, Body: {reason: string} Res: {status: 'rejected', refund_status: 'completed'}
[POST] /api/v1/consultations/{consultation_id}/end	Terminates the live session, computes exact elapsed billable minutes, deducts wallet dakshina, and credits astrologer.	Consumer App, Astrologer App	Req: Path: consultation_id, Body: {ended_by: 'user'|'astrologer'} Res: {status: 'completed', duration_seconds: int, billable_minutes: int, final_cost: float}
[GET] /api/v1/consultations/user/{user_id}	Returns consultation history for a devotee, with duration, cost, astrologer details, and remedies prescribed.	Consumer App, Consumer Website	Req: Path: user_id: string Res: List[ConsultationSummary]
[GET] /api/v1/consultations/astrologer/{astrologer_id}	Returns consultation ledger for an astrologer for auditing and payout calculations.	Astrologer App	Req: Path: astrologer_id: string Res: List[ConsultationSummary]
[POST] /api/v1/consultations/{consultation_id}/rtc-token	Generates a cryptographically signed Agora RTC Voice/Video Token for secure encrypted WebRTC media stream.	Consumer App, Astrologer App, Website	Req: Path: consultation_id, Body: {role: 'publisher'|'subscriber'} Res: {rtc_token: string, channel_name: string, uid: int, expires_in: int}
[POST] /api/v1/consultations/{consultation_id}/remedy-notes	Astrologer records prescribed Vedic remedies, recommended gemstones, and puja links for devotee's reference.	Astrologer App	Req: Path: consultation_id, Body: {notes: string, suggested_gemstone: string, suggested_puja_id: string} Res: {status: 'remedy_saved'}
[GET] /api/v1/consultations/{consultation_id}/messages	Retrieves consultation chat history with WhatsApp-style delivery statuses (sent, delivered, read).	Consumer App, Astrologer App, Website	Req: Path: consultation_id: string Res: List[ChatMessage: {id, sender_id, sender_type, text, attachment_url, timestamp, status}]
[POST] /api/v1/consultations/{consultation_id}/messages	Sends a real-time message inside an active consultation room with optional kundli chart attachment.	Consumer App, Astrologer App, Website	Req: Path: consultation_id, Body: {text: string, attachment_url?: string} Res: ChatMessage: {id, sender_type, text, timestamp, status: 'sent'}

2.8 Acharya AI Jyotish (24/7 Vedic Astrology Chatbot)

Real-time AI Vedic astrologer based on Maharishi Parashara astrological principles, planetary transits, Beeja Mantras, 3-step practical remedies, and linked temple puja recommendations.

Method & Endpoint	Feature Purpose & Exact Usage	Target Clients	Key Parameters & Output
[POST] /api/v1/ai/jyotish/chat	Analyzes astrological queries on Career, Marriage, Shani Sade Sati, Kundli Doshas, or Health; returns structured Vedic insights, Mantras, and Remedies.	Consumer App, Consumer Website	Req: Body: {query: string, language: 'hi'|'en', devotee_name?: string, dob?: string, tob?: string, pob?: string, rashi?: string, gotra?: string} Res: {sender: 'ai', time: string, title: string, text: string, mantra: string, remedy: string, suggested_puja: string, suggested_puja_slug: string, language: string}

2.9 Spiritual Puja Store & E-Commerce

Online spiritual marketplace for energized Nepali Rudrakshas, Sphatik Shivlings, Copper Yantras, Puja Samagri boxes, Hawan wood, and pure Camphor.

Method & Endpoint	Feature Purpose & Exact Usage	Target Clients	Key Parameters & Output
[GET] /api/v1/shop/products	Lists products with categories (Rudraksha, Idols, Yantras, Dhoop, Mala), price filter, and in-stock inventory status.	Consumer App, Consumer Website	Req: Query: category?, min_price?, max_price?, in_stock=true, limit=50 Res: {total: int, data: List[Product: {id, title, price, original_price, rating, image_url, category, stock}]}
[GET] /api/v1/shop/products/{product_id}	Returns full product specifications, consecration (pran pratishtha) certificate, dimensions, and customer reviews.	Consumer App, Consumer Website	Req: Path: product_id: string Res: ProductDetail: {id, title, description, price, energised_at_temple, material, images: [], reviews: []}
[POST] /api/v1/shop/orders	Creates an order for spiritual products with devotee shipping address and payment gateway link.	Consumer App, Consumer Website	Req: Body: {items: [{product_id, quantity}], shipping_address: Address, payment_method: string} Res: {order_id: string, total_amount: float, status: 'created', payment_order_id: string}
[GET] /api/v1/shop/orders/{order_id}	Fetches order tracking status, shipping courier AWB, dispatch date, and invoice download link.	Consumer App, Consumer Website	Req: Path: order_id: string Res: OrderDetail: {id, items, total, status: 'dispatched'|'delivered', courier_name, tracking_number}
[GET] /api/v1/shop/user/orders	Returns complete spiritual store order history for the logged-in devotee.	Consumer App, Consumer Website	Req: Header: Authorization Res: List[OrderDetailSummary]
[POST] /api/v1/shop/products	Admin endpoint to add a new sacred product to the divine store.	Admin Panel	Req: Body: ProductCreateSchema Res: {status: 'created', product_id: string}
[PUT] /api/v1/shop/products/{product_id}	Admin endpoint to update price, stock count, or product images.	Admin Panel	Req: Path: product_id, Body: Partial[ProductUpdate] Res: {status: 'updated'}
[DELETE] /api/v1/shop/products/{product_id}	Admin endpoint to delete or archive a product listing.	Admin Panel	Req: Path: product_id: string Res: {status: 'deleted'}
[GET] /api/v1/shop/categories	Returns all shop categories with item counts for store navigation drawer.	Consumer App, Consumer Website	Req: None Res: List[{id, name_en, name_hi, icon, product_count}]

2.10 Payments, Transactions & Wallet Ledger

Cryptographically verified financial ledger integrating Razorpay UPI/Cards and Devotee Dakshina Wallet.

Method & Endpoint	Feature Purpose & Exact Usage	Target Clients	Key Parameters & Output
[POST] /api/v1/payments/create-order	Creates a Razorpay payment order for puja bookings, chadhawa, consultation top-ups, or shop items.	Consumer App, Consumer Website	Req: Body: {amount: float, currency: 'INR', purpose: 'puja'|'astro'|'store'|'wallet', reference_id: string} Res: {razorpay_order_id: string, amount: int (paise), currency: 'INR', key_id: string}
[POST] /api/v1/payments/verify	Verifies HMAC-SHA256 signature from Razorpay after payment completion; updates booking status to confirmed.	Consumer App, Consumer Website	Req: Body: {razorpay_order_id, razorpay_payment_id, razorpay_signature} Res: {status: 'verified', transaction_id: string, message: 'Payment successfully captured'}
[POST] /api/v1/payments/webhook	Automated server-to-server webhook endpoint capturing async UPI payments, refunds, and chargebacks.	Razorpay Gateway	Req: Header: X-Razorpay-Signature, Body: Raw Webhook Payload Res: {status: 'webhook_processed'}

2.11 Sacred Certificates of Anushthan & Puja

Generates verified, tamper-proof digital certificates of sacred participation for completed pujas and chadhawas.

Method & Endpoint	Feature Purpose & Exact Usage	Target Clients	Key Parameters & Output
[GET] /api/v1/certificates/puja/{booking_id}	Generates and downloads a high-resolution PDF certificate of Puja Anushthan with priest seal and temple emblem.	Consumer App, Consumer Website	Req: Path: booking_id: string Res: Binary PDF stream (Content-Type: application/pdf)
[GET] /api/v1/certificates/puja/{booking_id}/data	Returns certificate metadata (Devotee name, Gotra, Puja title, Date, Priest name, Verification Hash) for in-app preview.	Consumer App, Consumer Website	Req: Path: booking_id: string Res: CertificateData: {certificate_no, devotee_name, gotra, puja_title, temple_name, date, verification_url}
[GET] /api/v1/certificates/chadhawa/{order_id}	Generates and downloads a sacred Chadhawa offering certificate confirming seva performed before the deity.	Consumer App, Consumer Website	Req: Path: order_id: string Res: Binary PDF stream (Content-Type: application/pdf)
[GET] /api/v1/certificates/chadhawa/{order_id}/data	Returns metadata for chadhawa certificate preview on mobile and web.	Consumer App, Consumer Website	Req: Path: order_id: string Res: CertificateData

2.12 Notifications & Devotional Alerts

FCM Push notifications and in-app alerts for live aarti start, puja schedule reminders, consultation call ringing, and prasad dispatch.

Method & Endpoint	Feature Purpose & Exact Usage	Target Clients	Key Parameters & Output
[POST] /api/v1/notifications/token	Registers device FCM Push Notification Token for the authenticated devotee or astrologer.	Consumer App, Astrologer App	Req: Body: {fcm_token: string, device_type: 'android'|'ios'|'web'} Res: {status: 'token_registered'}
[GET] /api/v1/notifications	Fetches in-app notification center inbox with unread counts and category filters.	All Clients	Req: Query: unread_only=false, limit=30 Res: {unread_count: int, notifications: List[NotificationItem: {id, title, message, type, is_read, created_at}]}
[PUT] /api/v1/notifications/{notification_id}/read	Marks a specific notification as read.	All Clients	Req: Path: notification_id: string Res: {status: 'marked_read'}
[PUT] /api/v1/notifications/read-all	Marks all devotee notifications as read.	All Clients	Req: None Res: {status: 'all_marked_read'}

2.13 Admin Portal & Platform Governance

Executive management endpoints for platform oversight, real-time KPI metrics, user role permissions, and full transaction ledgers.

Method & Endpoint	Feature Purpose & Exact Usage	Target Clients	Key Parameters & Output
[GET] /api/v1/admin/dashboard/stats	Provides real-time aggregate platform KPIs: Total Devotees, Total Astrologers, Booked Pujas, Total Gross Merchandise Value (GMV).	Admin Panel	Req: Header: Authorization (Role: admin) Res: {stats: {total_users: int, total_temples: int, total_astrologers: int, total_pujas_booked: int, total_revenue: float, active_calls: int}}
[GET] /api/v1/admin/transactions	Complete financial ledger of all platform payments, astrologer payout requests, refunds, and wallet adjustments.	Admin Panel	Req: Query: type?, status?, date_from?, date_to?, limit=100 Res: {total: int, data: List[TransactionRecord]}

[GET] /api/v1/admin/users	Lists all registered accounts with role filtering (devotees, verified astrologers, super admins).	Admin Panel	Req: Query: role?, search?, limit=50 Res: {total: int, data: List[UserProfile]}
[PUT] /api/v1/admin/users/{user_id}/role	Admin role assignment tool: Promotes an onboarded user to 'astrologer' or 'admin' status.	Admin Panel	Req: Path: user_id, Body: {role: 'user'|'astrologer'|'admin'} Res: {status: 'role_updated', user_id: string, new_role: string}

2.14 FAQs & Devotional Knowledge Base

Curated knowledge base answering questions regarding Vedic traditions, Sankalp accuracy, Prasad hygiene and doorstep delivery.

Method & Endpoint	Feature Purpose & Exact Usage	Target Clients	Key Parameters & Output
[GET] /api/v1/faqs	Retrieves all frequently asked questions with category filtering (Puja, Chadhawa, Prasad, Astrologers, Refunds).	Consumer App, Consumer Website	Req: Query: category?, language='hi'|'en' Res: List[FAQItem: {id, question, answer, category, display_order}]
[GET] /api/v1/faqs/{faq_id}	Retrieves a single FAQ item.	Consumer App, Consumer Website	Req: Path: faq_id: string Res: FAQItem
[POST] /api/v1/faqs	Admin endpoint to create a new FAQ answer.	Admin Panel	Req: Body: FAQCreateSchema Res: {status: 'created', faq_id: string}
[PUT] /api/v1/faqs/{faq_id}	Admin endpoint to update FAQ question or answer.	Admin Panel	Req: Path: faq_id, Body: FAQUpdateSchema Res: {status: 'updated'}
[DELETE] /api/v1/faqs/{faq_id}	Admin endpoint to remove an obsolete FAQ.	Admin Panel	Req: Path: faq_id: string Res: {status: 'deleted'}
[GET] /api/v1/faqs/categories	Lists all active FAQ category slugs and localized titles.	Consumer App, Consumer Website	Req: None Res: List[{category_key, name_en, name_hi}]
[GET] /api/v1/faqs/top	Returns top 5 most viewed queries for quick help accordion on the checkout page.	Consumer App, Consumer Website	Req: None Res: List[FAQItem]
[POST] /api/v1/faqs/feedback	Captures devotee helpfulness feedback (thumbs up / down) on an FAQ entry.	Consumer App, Consumer Website	Req: Body: {faq_id, helpful: bool} Res: {status: 'feedback_recorded'}

2.15 Core Health, OpenAPI & Legal Safety Endpoints

System health monitoring, OpenAPI documentation, Child Safety (CSAE) policies, and Data Privacy compliance.

Method & Endpoint	Feature Purpose & Exact Usage	Target Clients	Key Parameters & Output
[GET] /health	Liveness and readiness health probe returning database connectivity, cache status, and version for Railway.	Infrastructure, Uptime Monitor	Req: None Res: {status: 'ok', service: 'mandiram-backend', timestamp: string}
[GET] /	Root API gateway descriptor providing feature directory, documentation link, and platform greeting.	Browser, Developers	Req: None Res: {service: 'Mandiram Backend API', status: 'online', features: []}
[GET] /privacy	Serves public Privacy Policy for Google Play Store and App Store compliance.	Public Browser, Google Play Console	Req: None Res: HTML Document
[GET] /child-safety	Serves Google Play Child Safety & CSAE Policy detailing zero tolerance for abuse on 1-on-1 calls.	Public Browser, Google Play Console	Req: None Res: HTML Document
[GET] /csae-standards	Standards documentation on audio/video consultation moderation and reporting mechanism.	Public Browser, Compliance Auditors	Req: None Res: HTML Document

[GET] /openapi.json	Machine-readable OpenAPI 3.0 specification of all 94 endpoints.	Swagger UI, Postman, Code Generators	Req: None Res: OpenAPI JSON Schema

3. Feature-to-API Integration Matrix

The table below details how the primary user-facing features across the mobile and web applications map to the underlying APIs.

Feature / Capability	Client Interfaces	Associated Endpoints & Flow
24/7 AI Jyotish Vedic Chatbot	Consumer App (Modal, FAB, Search) Consumer Website (Bottom Dock, Header, Modal)	POST /api/v1/ai/jyotish/chat Processes natural language astrological queries, checks Parashara Vedic planetary alignments, and returns Beeja Mantras, 3 remedies, and linked temple puja recommendation.
Puja Booking & Sankalp Video	Consumer App & Website	POST /api/v1/bookings & GET /api/v1/bookings/{id} Devotee submits Gotra and family names; priest chants sankalp during ritual; admin attaches recorded sankalp video link via PUT /api/v1/bookings/{id}/status.
Live Aarti Darshan	Consumer App & Website	GET /api/v1/temples/{id}/live Streams real-time HLS video of Bhasma Aarti, Shringar, and Mangla Aarti from Kashi, Mahakaleshwar, and other 108+ mandirs.
Sacred Chadhawa & Offering	Consumer App & Website	POST /api/v1/chadhawa/offer & GET /api/v1/chadhawa/user/orders Enables devotee to offer pure Ghee, Flowers, or Shringar; priest submits confirmation photo proof visible in devotee's orders tab.
1-on-1 Astrologer Audio/Video Call	Consumer App & Astrologer App	POST /consultations/request & POST /consultations/{id}/rtc-token Locks wallet balance, connects Agora RTC encrypted voice/video channel; calculates exact elapsed duration upon /end.
WhatsApp-Style Chat in Consultation	Consumer App & Astrologer App	POST /consultations/{id}/messages & GET /consultations/{id}/messages Provides real-time messaging with single tick (sent), double gray tick (delivered), and double blue tick (read) statuses.
Digital Certificate of Anushthan	Consumer App & Website	GET /certificates/puja/{id} & GET /certificates/chadhawa/{id} Generates an authentic PDF certificate with verification hash, temple emblem, and priest seal upon completion.
Astrologer Availability & Payouts	Astrologer Mobile App	PUT /astrologers/{id}/availability & POST /astrologers/{id}/payout Live toggle for online/offline call availability, automated dakshina wallet calculation, and withdrawal to UPI or Bank account.

4. Security, Authorization & Google Play Compliance

Role-Based Access Control (RBAC): The platform enforces strict JWT Bearer token authorization across three roles: user (Devotee), astrologer (Verified Astrologer), and admin (Super Admin).
Data Privacy & Google Play CSAE Policy: Audio and video consultations are 100% private, peer-to-peer encrypted through Agora RTC. No continuous recordings are made without explicit consent. In-call reporting mechanisms exist to instantly block or report bad actors. Public policy endpoints (/privacy, /child-safety, /csae-standards) satisfy Google Play Developer standards.
Financial Cryptography: All payment verifications (POST /api/v1/payments/verify) employ HMAC-SHA256 signature verification preventing payment tampering or replay attacks.
